

INTERNATIONAL UNIVERSITY OF HEALTH AND WELFARE

GUIDEBOOK 2024

TAKAGI Kuninori
M.D., Ph.D.
IUHW Chairman

Message from the Chairman

The International University of Health and Welfare opened in 1995 in Otawara City, Tochigi Prefecture, as Japan's first comprehensive university of medicine and welfare, with the aim of nurturing and empowering health and welfare professionals. It consists of 10 schools and 26 departments on five campuses across Japan, and approximately 10,000 students, including postgraduate students, are currently enrolled. In the 28 years since its opening, the university has produced about 32,000 graduates. Having been educated by leading experts in their fields and excellent faculty members in accordance with the founding spirit of 'creating a society of harmonious coexistence,' our graduates are highly regarded both domestically and internationally.

The university provides an unparalleled environment for training, with six affiliated hospitals, related medical and welfare facilities and a number of overseas partner institutions.

On the Otawara Campus in Otawara City, Tochigi Prefecture, where the university was founded, we have established the *IUHW Rehabilitation Center*, consisting of support facilities for the disabled and facilities for children with severe mental and physical disabilities. Also, the University Clinic has one of Asia's leading speech and hearing centers. Both accept a large number of internship students. These locations also function as a clinical facility for students, together with the *IUHW Hospital* in Nasushiobara, the *IUHW Hospital*, the *Marronnier-en* long-term care facility for the elderly, and the *Tochinomisou* special nursing home for the elderly, all in the same area.

Okawa Campus located in Fukuoka Prefecture has clinical medical research centers scattered throughout the vicinity. The starting point for our company, the *Takagi Hospital* which has over 110 years of history, as well as *Yanagawa Rehabilitation Hospital* serve as the clinical training facilities for this campus.

The main Odawara Campus Building is conveniently located next to the railway station. Furthermore, the school building on castle grounds, *Jonai school* building, near Odawara Castle, boasts beautiful cherry blossom trees. The school has practical training in collaboration with the *IUHW Atami Hospital*.

The Tokyo Akasaka Campus, located in a prime urban location, educates specialists in mental health care and healthcare management and offers practical training at the *IUHW Mita Hospital* and other affiliated hospitals.

The Narita Campus, located in front of Kozunomori Station in Chiba Prefecture, which is a popular residential area, is home to the *Department of Medical Technology and Sciences*, the *Department of Nursing*, and a wide range of departments related to rehabilitation, as well as the first medical school established by a comprehensive medicine and welfare university. The *IUHW Narita Hospital*, which was established with the aim of becoming an international hub, is located nearby and supports students' learning in clinical practice.

As such, the university provides an environment in which students can study at medical and welfare facilities located right on campus and nearby. This cultivates a real connection to the clinical workforce, which is one of the university's major features. The university makes full use of this environment to achieve a 100% employment rate and a national examination pass rate that is among the highest in the country. The inaugural class of *School of Medicine* who graduated March 2023 also achieved an impressive 99.2% pass rate for the National Examination for Medical Practitioners. 15 international students are included in the successful students.

Another feature of the university is its international education. In addition to overseas training programs that let students experience medical and welfare workplaces around the world, the university has provided scholarships worth more than several billion yen to international students, mainly from Asia, and has trained many future leaders in the medicine and welfare fields in their home countries.

This year, we will continue to strengthen our educational, clinical, and research activities, aiming to reinforce our role as a leading health and welfare university in Asia. The entire teaching staff works together to train the medical professionals that are in demand both in Japan and abroad.

About International University of Health and Welfare (IUHW)

IUHW was founded in 1995 as the first comprehensive university of health and welfare in Japan to advance the social status of specialists in the field of health and welfare. Our goal is to train and educate future leaders in their respective fields, capable of responding to the advancement and specialization of health and welfare field with good judgment and intelligence. At the same time, we have been strengthening international relations and cooperation activities across the globe, especially with developing countries in Southeast Asia. Approximately 10,000 students currently study at 10 schools and 26 departments on 5 campuses located in Otawara City (Tochigi), Narita City (Chiba), Akasaka (Tokyo), Odawara City (Kanagawa), and Okawa City (Fukuoka).

Message from the President

Since its foundation, the university has consistently upheld its founding spirit of 'creating a society where the ill, the disabled and the able-bodied can live in harmony.' This spirit is also expressed in the university's unique educational philosophy and curriculum. Interprofessional Education is one such example in which cross-disciplinary teams are formed to experience team medical care. Additionally, Study of Overseas Health and Welfare fosters an international perspective by exposing students to overseas healthcare settings.

Common to all these features is diversity, which will become increasingly important in future societies. If the ill, the disabled, and the healthy, as well as people from various professional and cultural backgrounds are to live together in mutual acceptance, then it is crucial to embrace diversity and adapt to new environments. Since establishment of this university, we have continued to focus on the development of human resources who can accept such diversity not only in the field of medicine and welfare, where such cooperation is crucial, but also in a variety of situations.

Since its opening in 1995, as Japan's first comprehensive medicine and welfare university, our institution has fulfilled its raison d'être as a place not only to learn the knowledge needed to pass national examinations, but also to acquire a high level of education and genuine medical professionalism that can be utilized in the field of medicine and welfare. Leading experts in their fields are invited to join the teaching staff.

Also, clinical training is provided to the students early on. By providing a pioneering curriculum and learning environment, we train medical professionals with not only advanced knowledge and skills but also deep compassion for the human condition.

In the 28 years since the university opened, it has produced more than 32,000 graduates. Graduates who have deepened their knowledge at our university in accordance with our high principles are active in their respective fields of cooperative medical work. Today, many of our graduates have grown to become leaders in their respective multi-professional fields, such as the heads of various professional associations and heads of departments at our university.

Our university offers an unrivaled academic environment and an educational system that fosters medical and welfare professionals. Our students are privileged to have the opportunity to get clinical training at one of the six hospitals and Clinical Research Center for Medicine affiliated with our university. In addition, they can form interdepartmental teams and can experience team medical care under the guidance of doctors and specialists active in their fields of expertise.

This has been made possible due to our position as a medicine and welfare university that trains a wide variety of healthcare specialists.

We hope that students who choose to study at our university will make full use of the advanced educational and learning environment, and that they will be active in a wide range of fields both at home and abroad as truly internationally-minded medical and welfare professionals.

Professor **SUZUKI Yasuhiro**

M.D., Ph.D.
President

Profile

Graduated from Keio High School and Keio University School of Medicine. Doctor of Medicine. Obtained two master's degrees (Master of Public Health, Master of Science) from Harvard University Graduate School of Public Health, U.S.A. Served as Director-General of the World Health Organization (WHO) and Medical Technical Supervisor of the Ministry of Health, Labor and Welfare here in Japan. Executive Board Member of WHO since December 2022. Appointed as a professor at the IUHW Graduate School in January 2021 and the Vice-President in March of the same year. Has been in his current position of President since April 2022.

Message from the Dean, IUHW Graduate School

IUHW Graduate School was founded in 1999, with the aim to attract advanced-level medical specialists who will play leading roles in the fields of health, medicine, and welfare in Japan. IUHW Graduate School is unique in that our various arrangements to provide a sufficient research environment for people who work full-time. Currently, our students include those who actually work in the field of health and welfare, and those newly out of college.

Since the School's founding, new courses have been established focusing on various aspects of the health and welfare field. Some of these unique courses include the following: Reproductive Embryology (rare); Health and Welfare Journalism (first in Japan); Midwifery (a first as a graduate program); Clinical Psychology (designated by the Foundation of the Japanese Certification Board for Clinical Psychologists); Nurse Practitioner (pioneering course focusing on "specified practice"); Medical Administration; Human Health Related MBA (h-MBA); Advanced Care Network Development (has successfully promoted aged care to an academic level). In 2015, the Health and Welfare Education and Administration course was established with the aim of developing human resources who will play active roles as teaching and administrative staff in the field of health and welfare. Recently we have established several characteristic courses such as Medical Laboratory Science, Health Care Interpreting and International Health service Management, Genetic Counselling and Assistive Technology, Disaster Risk Management for Health, Medical Device Innovation to promptly capture up-to-date social needs and dynamically evolve by responding to those needs.

In addition to these distinguishing characteristics, we have excellent affiliated university hospitals (IUHW Hospital, IUHW Shioya Hospital, IUHW Ichikawa Hospital, IUHW Mita Hospital, IUHW Atami Hospital, and IUHW Narita Hospital) and many related health and welfare facilities in the IUHW group, including Sanno Hospital and Sanno Medical Center in Tokyo, Fukuoka Sanno Hospital, Fukuoka Central Hospital, Takagi Hospital, and Yanagawa Rehabilitation Center in Kyushu. As you know IUHW Narita Hospital opened in March 2020 as the university's sixth affiliated hospital to become the world's medical hub to provide advanced medicine in and outside Japan. All these hospitals provide clinical training opportunities for graduate students.

Furthermore, through a project strongly connected to graduate students and faculty members, we have diverse affiliations with facilities such as the Life-long Learning Center with three levels (first, second, and third) of courses for nurses; Nogizaka School at Akasaka, which offers night classes for those hoping to study topics related to medicine, welfare, and politics and the International Research Center of Health and Welfare. They all provide diverse learning and research options for graduate students.

IUHW Graduate School, which combines practical and well-organized education and research environments, will continue to advance comprehensive, graduate-level education and research opportunities in the field of health, medicine, and welfare, keeping sight of international perspectives. We appreciate your continued support.

YATOMI Yutaka

M.D., Ph.D.
Dean, IUHW Graduate School

Profile

Graduated from the University of Tokyo, Ph.D. in Medical Science. Former Professor of the University of Tokyo Graduate School of Medicine. He has served various positions such as an assistant to the President/Councilor for Education and Research, Vice Dean of Graduate School of Medicine/School of Medicine, the University of Tokyo, and Vice Director of the University of Tokyo Hospital.

The Principles and Educational Goals of International University of Health and Welfare (IUHW)

2023	APR	Establishment of Department of Nursing in School of Health Sciences at Okawa Establishment of Department of Care Worker: Special Advanced Course at Narita

Features of IUHW

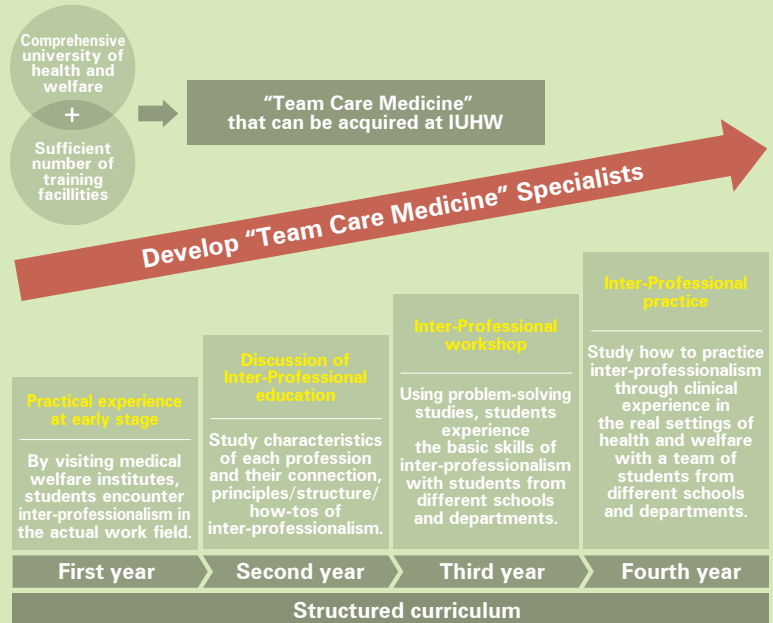

Inter-Professional Education (IPE)

We offer "Team Care Medicine," where different health and welfare specialists provide medical treatment and care to each patient.

With various types of health and welfare institutions, IUHW provides Inter-Professional Education (IPE) where students learn "Team Care Medicine," indispensable in the field of health and welfare over the coming years.

The IPE consists of four steps. Practical training in the fourth year will be conducted at a wide range of IHW group affiliated institutions, including six university hospitals. IUHW, as a comprehensive university, accepts students who aspire to become various types of medical specialists. It offers a unique curriculum where students can acquire "Team Care Medicine" through experience at the undergraduate level.

Employment Rate

Our university achieves a 100% employment rate every year.

We join our students' efforts as they consider how to move forward and how to build up their future careers as members of society and as medical and welfare professionals. We send them off to employment destinations where they can make the most of their individual strengths.

Support offered by the faculty

We have an employment support system in place with homeroom teachers, tutors, and seminar instructors. Through individual consultations, we strengthen students' confidence as professionals. Our aim is to work together with students to find employment that matches their hopes, personality, and characteristics, and provide detailed support for securing employment, while making full use of the faculty's extensive information network and alumni network. In addition, we invite alumni who are active on the front lines of their careers to give lectures and hold social events to help students visualize their future and raise their career awareness.

Support by the Career Support Center

The Career Support Center provides a variety of career support programs, including job information, guidance, and seminars to prepare for employment examinations, to support students from the time they are in school until after graduation. Resident career consultants provide friendly support so that each student can realize his or her desired career path. The newly introduced job placement support system allows students to view not only job offer information but also real exam results of their seniors on the web.

Various Scholarships

International University of Health and Welfare has established a number of scholarship programs unique to the university. Since its establishment, IUHW has aimed to nurture professionals in the fields of medicine and welfare who will become leaders in Asian countries, and has a full range of scholarship programs for international students.

IUHW Scholarship Program

Established in 2001, the IUHW Scholarship Program is a unique scholarship system that covers the full amount of tuition and other expenses for specially selected international students from Asia in order to contribute to the development of human resources who will play leading roles in the medical and welfare fields in Asian countries.

Scholarship for International Students in the School of Medicine

The School of Medicine has established a special scholarship system for international students from the School of Medicine to accept outstanding international students. The School of Medicine has concluded memorandums of understanding with governments and universities in six countries: Vietnam, Mongolia, Myanmar, Indonesia, Laos, and Cambodia. The scholarship covers recipients' entrance fees, tuition, textbooks, and living expenses for six years until graduation from medical school. The purpose of the scholarship is to contribute to the development of the healthcare field in their home countries after the international students obtain a medical license in Japan and gain clinical experience at hospitals affiliated with the university or other institutions.

National Examination Pass Rate

The International University of Health and Welfare maintains one of the highest pass rates in Japan each year for national certification examinations in various fields, such as care work, optometry, physical therapy, and occupational therapy.

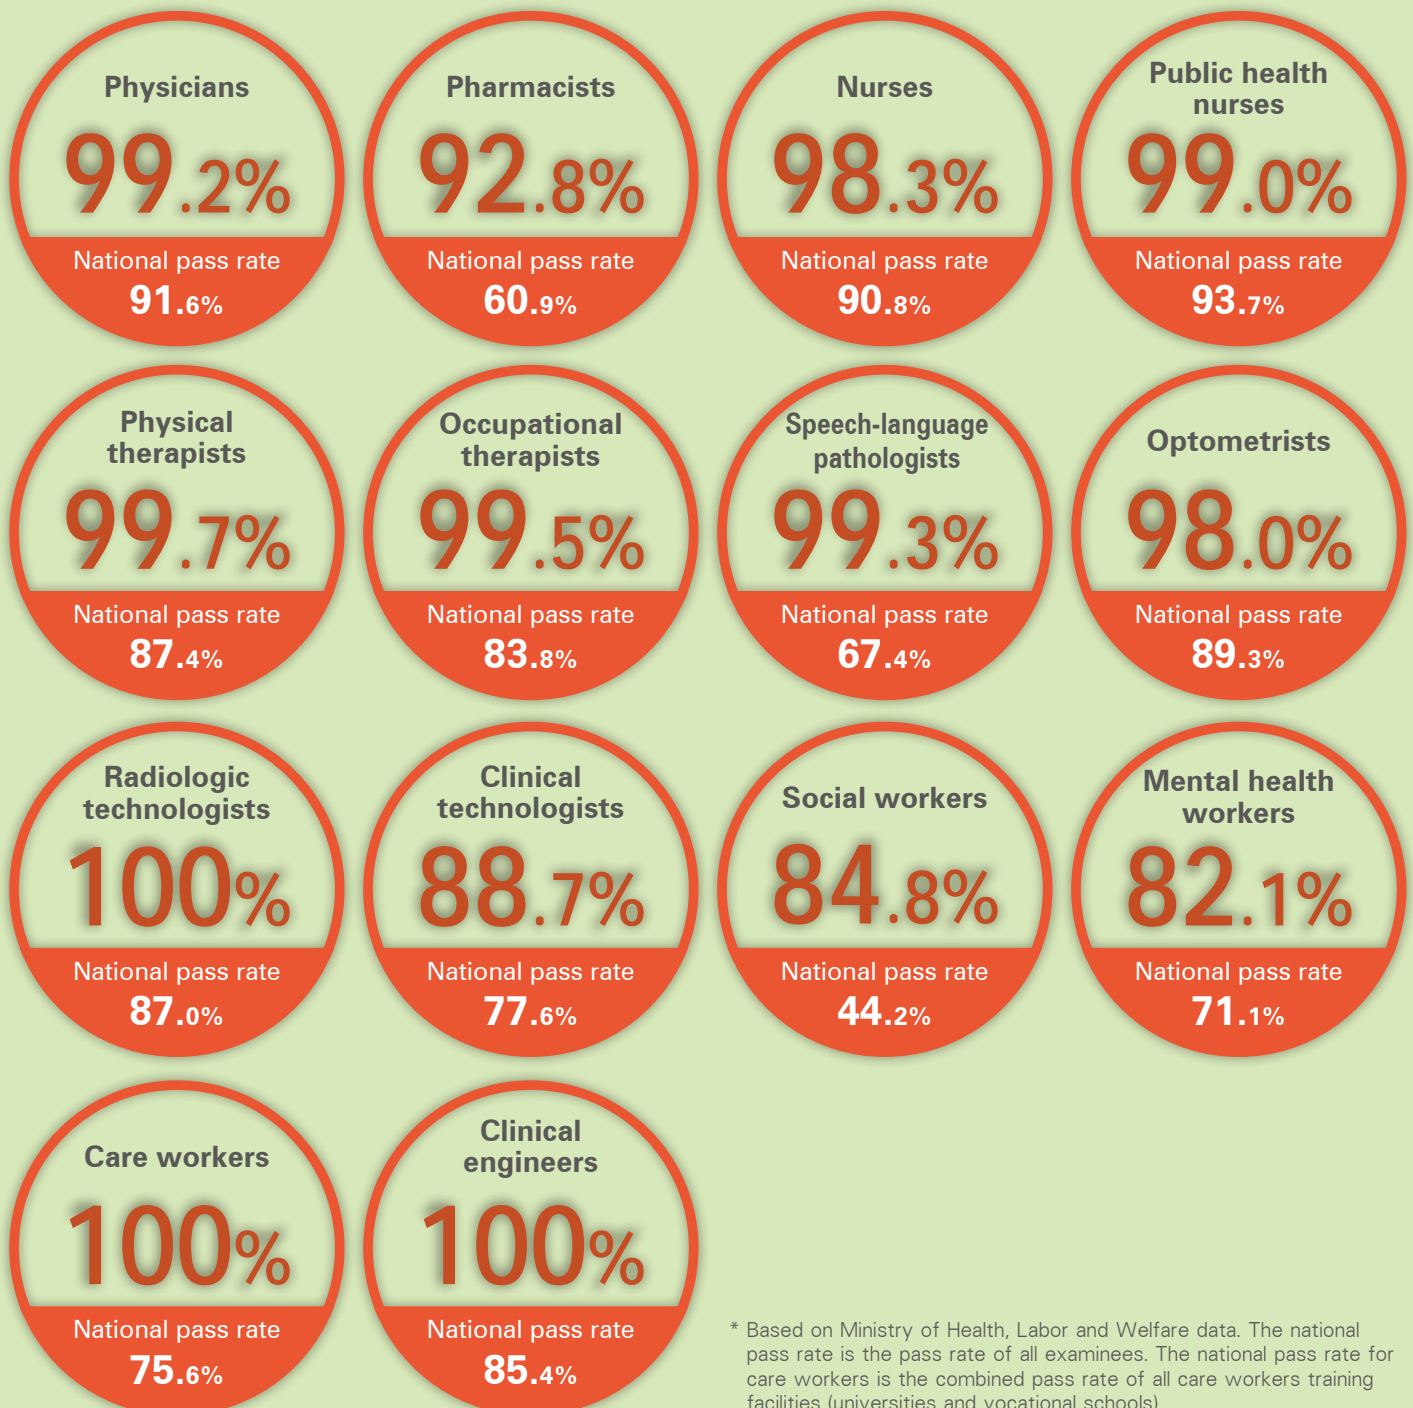

The university has achieved this high success rate by providing thorough preparation for the national examinations. The National Examination Preparation Committee provides detailed support to each student, including preparatory lectures, tutorials, and mock exams.

About the National Medical Examination

The first class of the School of Medicine, which opened in 2017, graduated in March 2023. 124 students, including 15 international students, passed the National Examination for Medical Practitioners. The passing rate was 99.2%, ranking second in Japan, which is an excellent result.

The School of Medicine has created a rich international learning environment, with one out of every seven students being an international student, which is unparalleled among medical schools in Japan. The school provides innovative and unprecedented medical education, including medical classes in English, more than 80 weeks of clinical practice (including overseas clinical practice), a spiral integrated curriculum, and clinical clerkships.

Pass rate of national examinations in 2022

* Based on Ministry of Health, Labor and Welfare data. The national pass rate is the pass rate of all examinees. The national pass rate for care workers is the combined pass rate of all care workers training facilities (universities and vocational schools).

University Hospitals & Affiliated Facilities

IUHW group has more than 60 medical and welfare facilities including six university hospitals and Sanno Hospital in Tokyo. Those facilities provide valuable opportunities for clinical training for students to develop their expertise.

Students will experience “Team Care Medicine” in clinical practice and study advanced skills with state-of-the-art medical devices. This is one of the most unique features of IUHW as a university with various facilities for clinical training. In addition, as many graduates work at IUHW university hospitals and affiliated facilities, students can enjoy OJT from their seniors in a caring atmosphere.

IUHW Narita Hospital/Chiba

IUHW Narita hospital with international features was established with 642 beds on 105,513m² architectural area. At the hospital, physicians and medical staff with a good command of foreign languages are assigned. The hospital aims to be a global standard hub hospital by providing multiple language services, religious meals, spaces for religious purposes, excellent facilities, as well as cutting-edge medical services and equipment. Featuring centers, including the International Remote Diagnostic Center and the International Clinical Center for Infectious Diseases, aim to act as bases for collaboration with overseas universities and medical institutions.

Furthermore, the Center for Preventative Medicine, featuring swimming pools, a gym, and other facilities, provides a variety of health checkup options.

IUHW Hospital/Tochigi

Number of beds: 408

IUHW Hospital is a foundation hospital. It is located at the northern region of Tochigi and designated as an emergency care and an emergency pediatric hospital.

IUHW Shioya Hospital/Tochigi

Number of beds: 240

IUHW Shioya Hospital is a regional core hospital. It is designated as an emergency care hospital and a core cancer treatment hospital in Tochigi.

IUHW Ichikawa Hospital/Chiba

Number of beds: 260

In September 2017, “Kaken Hospital” became “IUHW Ichikawa Hospital.” It supports treatment in a wide range of fields, notable the orthopedic surgery department, rehabilitation, and so on.

IUHW Mita Hospital/Tokyo

Number of beds: 291

IUHW Mita Hospital is designated as an emergency care hospital and a regional cancer hospital in Tokyo.

JCI-Accredited Organization (2015–2021)

IUHW Atami Hospital/Shizuoka

Number of beds: 269

Overlooking the ocean, IUHW Atami Hospital serving eastern Shizuoka and western Kanagawa is a foundation hospital. It is designated as an emergency care hospital and a regional cancer hospital in Shizuoka.

Narita Campus

Fostering international medical professionals with an enrollment capacity of 140 students

First medical school in Japan to have a high ratio of foreign students (20 out of 140) in one grade. Of the 6 years of study, the first two will be taught mainly in English. From the 3rd year to graduation, classes will be focused on fostering clinical abilities. over 80 weeks of clinical clerkship will take place from the 4th year at institutions, not only IUHW university hospitals, but other group institutions. All students will undergo over 4 weeks of clinical practice overseas in the final year of their study. To bring distinction as a comprehensive university of health and welfare, our curricula feature "Inter-Professional Education." Students from different schools gather to experience and actually get acquainted with "Team Care Medicine."

Department of Pharmaceutical Sciences

We educate top-class medical professionals devoted to "Team Care Medicine"

Our program offers trainings not only at on-campus facilities, but also at IUHW hospitals and affiliated hospitals which provide students with great practical experience from clinical training in Year 5. These trainings prepare students with the flexibility to demonstrate their abilities in "Team Care Medicine" and enable them to become top-class pharmacists.

Department of Social Services and Healthcare Management

Otawara Campus

We train professionals able to comprehensively support health and welfare

Japan has one of the longest life expectancies in the world. In order for people to live healthy and quality lives, experts with knowledge both on health and welfare are in high demand. Additionally, management skills are also essential to play central roles in practical health and welfare. Although there are many colleges and vocational schools focusing on social welfare and medical office work skills, our program trains professionals with knowledge in three different but related fields: medicine, welfare, and management.

National Licenses

Active International Exchange

Overseas Partner Universities and Institutions

IUHW has signed partnership agreements with 47 institutions in 24 countries/regions (as of April 2023).

Department of International Affairs and International Centers of IUHW plan and operate international projects and collect relevant overseas information. We also manage a variety of international exchange activities such as accepting short-term trainees from China and other countries, and provide overseas training courses for IUHW students.

Various Forms of International Exchanges and Cooperative Activities

IUHW School of Medicine Special Scholarship Program for Overseas Medical Students

IUHW has a scholarship program for international students who pursue a career in medicine. We offer students who had an outstanding score on entrance examination the full amount of six year's tuition fee through to graduation, as well as an enrollment fee, material fees, and living expenses. We have signed a memorandum of understanding with the governments and universities in six countries of Vietnam, Mongolia, Myanmar, Indonesia, Laos, and Cambodia. The purpose of this program is for scholarship students to gain Japanese medical license, and after having clinical experience in the affiliated facilities, to return their home countries and contribute in the development of health and medical care.

IUHW Scholarship Program

IUHW established its own scholarship program for students from Asian countries in order to contribute in the development of human resources who will become leaders in medical and welfare fields. Strongly supported by the "Asia-Pacific Ladies Friendship Society," in selecting international students to be awarded scholarships, the program covers the total amount of tuition and other expenses. International students in the program are obliged to return home as soon as their graduation and take on leadership positions in their relevant fields. In 2018, we have signed a memorandum of understanding with Mongolian government and established another scholarship program for Mongolian students from fiscal year 2019. We also have signed MOU with the Ministry of Health of Vietnam in 2019 and newly started Scholarship Program for Vietnamese Students from fiscal year 2020. The scholarship is granted to up to 10 students who are qualified public selections in both countries for five years.

Academic Exchange Agreements

For international students, IUHW has set up a comfortable study environment such as scholarship programs and Japanese Language Program (JLP) for pre-enrollment students to study Japanese language. So far we have accepted total 666 students (as of March 1, 2023). There are quite many graduates who actively play various roles in medical and welfare fields in Japan as well as in their home countries.

Telepathology and Telediagnosis Projects

Since fiscal year 2011, under the auspices of the international medical alliance project promoted by the Ministry of Economy, Trade and Industry (METI), IUHW successfully conducted the "Remote Pathology and Diagnostic Imaging Project" in China and Vietnam. In addition, we will also carry out a "Practical Investigation Project to Establish a Remote Image Diagnosis and Training Center" in Vietnam and Myanmar. These projects combine advanced Japanese diagnostic technology with advanced test equipment technology and ICT are developed as a remote diagnostic system in countries lacking specialists in diagnostic imaging and pathology. We will continue to work on technical exchanges and medical support for international contribution.

Establishment of health checkup center in Vietnam

In October 2018, IUHW opened a Japanese style of health checkup center, "Health Evaluation and Promotion Center - Cho Ray Hospital International University of Health and Welfare (HECI)," in Ho Chi Minh City in collaboration with the national Cho Ray Hospital, the first of its kind in Vietnam. The facility features high standard of health checkup services our group has to offer, with state-of-the-art equipment and relaxing environment.

Promotion of Overseas Medical Cooperation

IUHW actively promotes international medical cooperation to embody one of the fundamental principles, "University directed towards the attainment of global standard." As an example, IUHW donated rehabilitation equipment to the National Rehabilitation Hospital in Yangon, Myanmar in 2017. A memorandum of understanding on human resource development in the field of rehabilitation was signed with the Ministry of Health and Sports in Myanmar, and "IUHW Rehabilitation Training Center" was established in the hospital. In addition, IUHW, together with Sanno Hospital, concluded tripartite academic agreement with Hung Vuong Hospital in Vietnam, and promote the cooperation of (1) exchange of experts and researchers, (2) student training at Hung Vuong hospital, and (3) research cooperation and academic conferences.

General Education Subjects: Overseas Training Program

After pre-visit courses in Japan, students travel and study different cultures, health care, and welfare at overseas partner's medical institutions, welfare facilities, universities, and other relevant facilities for approximately two weeks during either summer or winter breaks. Under the guidance of local medical staff, they acquire valuable experiences by being involved in actual medical settings in foreign countries and regions. During academic year 2019, 739 students trained at medical, health, and welfare facilities in various countries such as Australia, Korea, and Vietnam. (Due to the Covid-19 pandemic, this program was implemented online in 2020 and 2021. IUHW resumed its overseas training program in winter 2022.)

739 Students

went overseas to experience medical welfare on the scene in the academic year of 2019.

Online Overseas Training Participants

Although the overseas training program was canceled again in 2021 due to the COVID-19 pandemic, real-time online training was conducted with universities and research centers in China, Singapore, Thailand, Cambodia, and Hungary, all of whom are involved in collaborative agreements with our university. In addition, universities in Korea, Taiwan, and other countries provided us with recorded lectures.

Other participants' assertiveness inspired me

I participated in two online exchange programs, one with a university in Singapore and another in Mongolia. The exchange involved presentations and discussions on healthcare systems and introductions of each other's culture. The fact that students on the other side of the screen were able to ask questions openly, even when speaking to a teacher, made a big impression on me. I strongly felt that I would like to study English more and become a confident speaker as I aim to be involved in international activities through NGOs in the future.

School of Health Sciences at Narita,
Department of Medical Technology and
Sciences (4th year)

TANAKA Shisai

My resolve to realize my future dream got stronger.

In the group work after the lecture, we interacted with each other keeping in mind how the healthcare system differs between Japan and Singapore due to the differences in culture and traditions between the two countries. My dream is to develop new endocrine drugs other than injectable drugs, which are too burdensome for children and the elderly. Through this training program, I realized that there are many patients overseas who find injectable drugs burdensome, which further strengthened my desire to realize my dream.

International Students

Features

1

University to foster health, medical, and welfare professionals

2

One of the few universities with entrance exam intended for international students in the health, medical, and welfare fields

4

Various supporting system for international students

- Undergraduate students with student visa can receive waivers of up to half of their tuition and course fees (other fees apply) under certain conditions. To some extent, the waiver of school expenses for graduate students is also available.

3

A career path where students can attain national medical qualifications and then work in Japan

Qualifications to obtain a medical care visa: Doctor, Pharmacist, Nurse, Public Health Nurse, Physical Therapist, Occupational Therapist, Orthoptist, Radiological Technologist, Care Worker

- International students with IUHW Bachelor's Degree who intend to study further at IUHW Graduate School are to be remitted all of their entrance fee.
- Several private agencies and local autonomous bodies offer various types of scholarships for international students.
- When students join the National Health Insurance, 70% of their medical bills are covered by the insurance. In addition, the IUHW education mutual aid can support the students by covering the rest of the 30%, which means there is no need for international students to worry about medical expenses. For that privilege, each undergraduate pays 30,000 yen per year to the mutual aid, which is compulsory. However it is optional for graduate students.
- Student Dormitory (conditions of use apply)

For details, please consult the school staff responsible for this matter.

Special Entrance Examination for International Students

Screening: Every applicant is required to take the Examination for Japanese University Admission for International Students (EJU), and essay written in Japanese. Each applicant will be interviewed by faculty members.

Qualification:

Applicants should fulfill the following conditions:

- Non-Japanese citizen and age 18 or over
- 12 years of education outside Japan, and with student visa to stay in Japan
- Japanese language proficiency to be able to attend classes taught in Japanese

The above requirements will vary. For the latest and precise information, please contact the admissions office.

Campus Calendar

The school year begins in April, and academic year consists of two or three semesters (School of Medicine).

April	Entrance ceremony/Orientation Beginning of the first semester
May	Founders' Day (Holiday for IUHW) Sports Day
July	Final examinations for the first semester Completion of the first semester (at the end of the month) Summer break
September	Beginning of the second semester (at the end of the month)
October	Exchange party/School festival
December	Christmas party/Winter break
January	Final Examinations for the second semester Completion of the second semester (at the end of the month)
February	Spring break
March	Graduation ceremony

International Center

At Otawara and Narita Campus, there are sections called International Center, where dedicated staff offer assistance to international students. The following is a list of what is offered at the center:

1. Japanese Language Classes

Instructors who specialize in Japanese language offer Japanese classes to international students. They offer not only classes but also any help and support concerning language problems the students might face.

2. Visa

When students need help in applying for and acquiring a visa, extending and renewing their visa, and for permission for other activities, the center staff is always there to help them.

3. Housing

Students are advised to contact the center regarding housing. The City of Otawara has its own housing policy, and international students are welcome to stay in city-owned apartments at affordable rate. Many of the international students of Narita Campus live in IUHW dormitory called "Narita International House."

4. Events

The center plans events for international students, so that they can get to know each other and learn to support one another. Japanese students are also invited, so that students on campus, regardless of nationality, can all be good friends.

International Students Studying at the IUHW

Naw Wathong Oo

From the Republic of the Union of Myanmar
3rd year student in School of Medicine at Narita Campus

High quality education and generous support are attractive

As I aspire to become an internationally active doctor, I was attracted to this university not only because of its international high quality education, but also because of its extensive practical education. Another thing I had hoped for was the opportunity to interact with international students from various countries. Lectures are given in both English and Japanese, and active learning is also incorporated, which is easy to understand and allows me to learn efficiently. The only thing I was worried about was whether or not I would be able to adjust to life in Japan but International Center has provided me with support in terms of daily life, so I am able to concentrate on my studies without worrying.

Japanese Language Program (JLP)

JLP is designed for people whose native language is not Japanese to help them acquire Japanese language proficiency, and deepen their understanding of the situation, culture, and other aspects of Japan. Experienced, dedicated staff in charge of international students are available to assist them with all of their academic and personal needs, including living arrangements in Japan, JLP studies, and advancement to universities and other schools. JLP students have access to the same facilities as IUHW students. Furthermore, our program allows students to take some of the courses offered at IUHW and graduate schools. With networking events also available for international students, JLP offers opportunities for students to lead an enriching campus life.

Features

1

Customized Academic Guidance

All classes have homeroom faculty. Experienced faculty provide meticulous guidance.

3

Tailored Guidance on Post-completion Plans

Various supports are available to make students' post-completion plans.

2

Extensive Supports

Extensive supports are offered for students' academic and personal needs.

4

Japanese Language Program by University Specializing in Health and Welfare

Credited Auditor System

Students who satisfy the Japanese language proficiency and other requirements may take some courses that are offered at IUHW undergraduate or graduate schools. In addition, tuition will be waived for up to three courses per semester. If students qualify for credit under this program, in some cases the credit will be counted if and when they enroll in IUHW undergraduate and graduate schools.

Volunteer Activities

IUHW encourages students to participate in volunteer activities, by sharing one's time and talent, by communicating with others which are required of medical and welfare service professionals.

In the university, there are more than 30 active volunteer groups.

Volunteer Activities at Medical and Welfare Facilities on Campus

Students interact with facility users at the medical and welfare facilities on campus.

Activities to Interact with Children

Students are having a good time with children who go to the school facility near the university.

International Volunteer Activities

Students engage in activities related to international health and international cooperation.

Classroom scene

Admission Requirements

- Applicant should be a non-native speaker of Japanese and be able to obtain a Certificate of Eligibility for resident status.
- Applicant must have completed at least 12 years of basic education in a country outside Japan, or have the equivalent education (this condition should be met before entering JLP).

For more information on applying, see the Application Guideline.

Curriculum

- One-year program*: The university will confer certificates of completion to students whose completion of the program was approved.
- Spring semester (April-September) and Fall semester (October-March). Applications are accepted twice a year.
- Length of courses in a semester: 18 weeks

*Students wishing to continue their studies can enroll up to two years.

Concerts at Hospitals and Welfare Facilities

Students visit hospitals and welfare facilities and perform choral concerts.

IUHW Volunteer Center (at Otawara Campus)

The Volunteer Center supports students who would like to participate in these volunteer activities. The center also plans and carries out lectures by volunteers active in Tochigi and events to promote exchanges with students from other universities.

Graduate School International University of Health and Welfare

“For researchers to explore the future of health, medical, and welfare fields”

The Graduate School at International University of Health and Welfare offers programs for scholars for further mastery as researchers and expert medical partners. The curriculum is designed to accommodate those who work during the day and the graduate school welcomes those who have been away from study for a while.

History

The Graduate School of IUHW aims to foster health and welfare researchers, educators, and experts to meet the needs of the 21st century. It opens its doors to those who want to research and investigate further while still working full-time.

1999	Establishment of MS Program in Health Sciences
2001	Establishment of PhD Program in Health Sciences and MA Program in Health and Welfare, and Health Service Management
2004 MAR	First year to grant doctoral degrees—the completion of the entire educational program at IUHW
APR	Establishment of Department of Clinical Testing Laboratory Research (In 2008 the title of the same specialty changed to Research and Development of New Medicinal Treatment*.)
2005	Establishment of Departments of Assistive Cytogenic Reproduction* and Health and Welfare Journalism*
2006	Establishment of Departments of Midwifery and Orthoptics and Visual Sciences
2007	Establishment of MS Program in Clinical Psychology
2008	Establishment of Department courses in Radiological Technologist for Cancer Treatment, Certified Pharmacist for Cancer Medicinal Treatment, and Technical Cancer Registry (Supported by the Ministry of Education and Science “Training Scheme for Cancer Treatment Professionals”)
2009	Establishment of Department of Pharmaceutical Sciences and MS program for Biosis-pharmacy Establishment of the PhD Program in Pharmaceutical Sciences Establishment of Department of Nurse Practitioner
2010	Establishment of MA Program of Business Administration in Healthcare (h-MBA) Establishment of Department of Health Information Management and Analysis
2011	Establishment of PhD Program in Journalism in Healthcare Establishment of PhD Program in Clinical Psychology Establishment of Department of Assistive Technology Science
2015	Establishment of Departments of Education and Management in Health and Welfare
2016	Establishment of Departments of Medical Laboratory Science
2017	Establishment of Departments of Health Care Interpreting and International Health Service Management
2018	Establishment of PhD Program in Medicine Establishment of MPH Program in Public Health

*Entirely new departments in Japan

Campuses and Curricula for scholars to learn and research while working

More and more health and welfare specialists want to study at graduate school to gain advanced knowledge and skills while working. As the number is increasing year by year, our graduate school has set up seven campuses in Otawara, Narita, Akasaka in Tokyo, Odawara, Atami, Fukuoka, and Okawa. Most classes are scheduled in the evenings and on Saturdays. In addition, our MS program for Clinical Psychology has been accredited (as a class 1 Graduate School) by the Foundation of the Japanese Certification Board for Clinical Psychologists.
